EXPERIENCE

Applications / Software Developer Housing Finance Bank
February 2025: present

- Use Hangfire to process transactions that were timing out, which had left customer debits short.
- Build deployment pipelines and container orchestration for the bank's migration of applications to Red Hat OpenShift.
- Monitor application health with Grafana, so problems are visible before they reach customers.
- Integrate bank applications with the Oracle core banking system.
- Perform static application security testing (SAST) and risk analysis before production deployments.
- Deliver loan disbursement and collections through service-oriented integrations with third parties; this supports growth of the business portfolio.
- Automate business processes, so customer operations continue without manual rework.

Software Developer Mcash Uganda Limited
October 2022: February 2025

- Built and improved the front end with CodeIgniter 4, Laravel, and Bootstrap, so pages stayed fast and easy to use.
- Advanced the Agrilink product using usage data, which improved the digital experience for customers.
- Integrated Airtel and MTN, so traders can pay farmers.
- Created Cyclos cron jobs to complete those trader-to-farmer payments.
- Set up AWS DevOps practices that shortened the path from development to release.

Consultant, Full Stack Software Engineer Kanzu Code
July 2021: August 2024

- Led development of a church management system, so staff can assign activities to users.
- Built the platform with React, React Hooks, ES6, React Testing Library, Tailwind CSS, and React Query.
- Set up a CircleCI pipeline for build and deployment.
- Worked with developers and the business to integrate the application with the NestJS backend.
- Kept the interface working across browsers, and aligned it with W3C accessibility guidance.
- Built and deployed custom WordPress plugins and theme templates.

Software Developer Apprenticeship Refactory Academy Uganda
January 2021: present (seasonal)

- Developed web applications, mobile applications, and microservices for Project Screen's waste-management products.
- Used React, TypeScript, Jest, Python, Django, and MySQL.
- Mentored junior developers in Python, Django, and Node.js while debugging a farm-management system and a motor spare-parts system.

Freelance Backend Developer Upwork
January 2022: June 2022

- Built and maintained a shared library, so teams could reuse code instead of duplicating it.
- Automated performance testing with Lighthouse and Puppeteer.

IT Support, Customer Support Orisa Consult LLC
June 2018: January 2022

- Provided IT support and customer support for a web application that helps casual workers manage repair requests.

SUMMARY

- Software developer building web, mobile, and business applications in C#, JavaScript, PHP, Kotlin, and TypeScript.
- Takes products through the full development cycle: design, implementation, testing, release, and maintenance.
- Raised automated test coverage from 20% to 90% on the user onboarding and payments modules with unit and integration tests.

EDUCATION

Postgraduate Diploma, Information Technology
Uganda Management Institute July 2025: July 2026

Certificate, Software Engineering
Clarke International University January 2021: December 2021

Bachelor's degree, Information Technology
Makerere University August 2012: September 2016

SKILLS

- **C#**, JavaScript, HTML/CSS/SCSS, PHP.
- **Laravel**, CodeIgniter 4, Hangfire, Java, Spring Boot, TypeScript, Next.js, Scrum.
- Redux, Node.js, NestJS (basics).
- Express.js, Python, Django, Material UI, Bootstrap.
- Tailwind CSS, React.js, Angular, Kotlin (basics).
- WordPress, Jest, Jenkins, Mocha, Selenium, Puppeteer, Linux.
- Redis, Kubernetes, OpenShift, Grafana, Socket.
- Oracle, MySQL, PostgreSQL, MongoDB.
- Firebase, CI/CD, AWS, Google Cloud.

AWARDS

- **Kubernetes and Cloud Native Essentials (LFS250)**, The Linux Foundation, September 2026; credential ID LF8u3do09b21.
- Full Stack Track, Tunga Impact Academy, 2023.
- Code Impact tutoring and mentorship with Micro:bit for students aged 12 to 18.
- Refactory mentorship programme, Refactory Uganda, 2022.
- Certificate of Completion, JavaScript Code Challenges, LinkedIn Learning, 2022.
- Leadership and Software Development certificate, Refactory.
- Microsoft Server Associate certificate, Windows Server 2012 R2, Aptech Computer Education.
- Cisco Networking Bootcamp: basic switch and router configuration, 2022.
- Digital marketing, Google Africa Digital Garage.
